

Surgeries and Procedures is a series of 151 fully-illustrated, interactive health presentations that depict common surgeries, tests, and procedures with over 600 full-color medical images, labels, and descriptive text. Each presentation is an easy-to-understand, step-by-step explanation that effectively reaches a broad audience including those with low health literacy.

Surgeries and Procedures offers a visually engaging way to understand complex medical topics, encouraging your users to return whenever they need answers to common surgical or procedural questions. Surgeries and Procedures is also ideally suited for Informed Consent purposes.
